

**Jefferson County Commissioner  
Brent A. Weaver  
Road & Bridge Precinct 2  
*News Advisory***

May 2, 2011

Point of Contact: Brent Weaver, Commissioner Pct 2 – 727-2173

***Jefferson County Precinct 2 Commissioner Brent Weaver and staff begin  
road construction phases for numerous roads in Precinct 2***

Road construction season is here. We have been conducting county road surveys in Pct 2 by our Road Division; we have discovered and recorded several roads which have road failures and potholes. As a part of our road construction program we will be rebuilding sections of the roadway during the next few months. When road failures and potholes develop we want to immediately address these road issues. Please be aware we will have road crews out on the roadway during this time and please observe all warning signs posted for work crew safety.

The county roadway construction program is essential to our rural areas in order to maintain our county roads. If you have any questions; please contact the Jefferson County Road & Bridge Pct 2 -Road Division at 727-2173.

\*The weather may cause this schedule to be altered.

Thank you for your patience and cooperation during our road re-building process in front of or near your home. We want to do all we can to keep the County roadways from developing potholes and re-build any road base failures providing you with a safe roadway. Our road maintenance is an important task in protecting and maintaining the roadway as well as your safety.

The Jefferson County Commissioner Road & Bridge Pct 2 monitors over 90 miles of County roadway and approximately 8 bridges in Pct 2. Additional, the precinct covers approximately 120 square miles. We assist the City of Groves, Nederland and Port Neches as well as school districts in Pct 2 with road projects through an inter-local agreement. **The road repair schedule for Pct 2 is listed below:**

**The Jefferson County Pct 2 Commissioner’s Office offers these driving tips:**

- Avoid unnecessary travel on roads under construction, if possible.
- Reduce driving speed to correspond with road conditions and construction areas.
- Increase the distance from the vehicle ahead of you.
- Observe all safety and warning signs in the construction areas.
- Slow down as you approach construction areas or warning signs in the roadway.

We will be applying primer oil and other materials during this road re-building phase, please avoid parking on the roadway during this time. In addition, please refrain from driving on the roadway when the oil is fresh; but if you must utilize the road please be aware your speed should be kept below 5 miles per hour to avoid getting oil on vehicles if they must travel on the road while the oil is fresh. Also if you drive on fresh oil; be aware the fresh oil could be tracked onto your concrete driveways. Your cooperation in keeping a safe speed while traveling in the construction areas is also appreciated.

Thank you.

**Roads to rebuilt in Pct. 2 during 2011**

River Parking Lot			
Entrance to River PL		Vendor Rd. to Parking Lot	Linear Ft: 26,985 Avg. W.: 35 feet Total miles 5.11

We also have a parking and road project for PNG-ISD between Merriman and Park Street. Tentatively scheduled to begin the last day of school and completed during the summer months while school is out. This project is located near the gym area where the railroad tracks were removed. It would add additional parking for that area and construct a new road.

2011 City of Groves Road projects with assistance from Pct 2. We will provide a road crew, paving machine, steel wheel roller and 4 dump trucks to provide assistance in the construction of a new HMA lime stabilized sub grade hot mix asphalt road 16, 250 square feet for the city of Groves.

This is a tentative schedule and is subject to change due to staffing, weather and budget. As we continue to evaluate the road conditions we could add roads to this list depending on staffing and budget.
