

*Jefferson County
Road & Bridge Precinct 2
Commissioner Brent Weaver*

Dear Precinct 2 Resident:

It has come to our attention through a road survey and analysis by our Pct 2 Road Division the County roadway in front of your home, or near your property has road failures and potholes. As a part of our road construction program we will be rebuilding sections of the roadway during the next few weeks. When road failures and potholes develop we want to immediately address these road issues. Please be aware we will have road crews out on the roadway during this time and please observe all warning signs posted for work crew safety.

The county roadway construction program is essential to our rural areas in order to maintain our county roads. We will be applying primer oil and other materials during this road re-building phase, please avoid parking on the roadway during this time. In addition, please refrain from driving on the roadway when the oil is fresh; but if you must utilize the road please be aware your speed should be kept below 5 miles per hour to avoid getting oil on vehicles if they must travel on the road while the oil is fresh. Be aware that fresh oil could be tracked onto your concrete driveways. Your cooperation in keeping a safe speed while traveling in the construction areas is also appreciated. If you have any questions; please contact the Jefferson County Road & Bridge Pct 2 -Road Division at 727-2173. *The weather may cause this schedule to be altered.

Thank you for your patience and cooperation during our road re-building process in front of or near your home. We want to do all we can to keep the County roadways from developing potholes and re-build any road base failures providing you with a safe roadway. Our road maintenance is an important task in protecting and maintaining the roadway as well as your safety.

Thank you.
